

Hostas

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Abba Dabba Do Hosta	13	L	24-30	40-60	Green with gold edge	1986	Sport of H. 'Sun Power'. This hosta starts out as all green and quickly develops a bright yellow edge offering a wonderful contrast to the green. The flowers are lavender. Forms a beautiful vasselike clump 4-5' in diameter. Can tolerate and use a lot of sun to its growth advantage but forms decent sized clumps in shade also.	1# = 5; 2# = 7.50	
Abiqua Drinking Gourd Hosta	14	ML	24	45	Blue	1989	A 'Tokudama' x sieboldiana hybrid, with thick, heavily puckered blue foliage. The leaves are deeply cupped and are held upright, forming an open clump about 20" tall. The cupped and rugose leaves of this plant have a thick layer of wax (bloom) which creates a nice powder blue/gray color. Near-white flowers. Slugs avoid its wonderful texture and substance.	1# = 5; 2# = 7.50	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Allegan Emperor Hosta	6	L- Giant	30	71	Bluish Green to Green	2000	Forms a huge, vase-shaped mound of foliage that changes from bluish green in spring to a shiny, dark green by July, great choice as a background or specimen plant.	10	
Allegan Fog Hosta	4	M	18	39	White to light green speckled center with green edge.	2000	A very unique hosta that has white centered leaves, edged in medium green. The white center is misted with tiny green speckles. The center turns light green later in the season.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Ann Kulpa Hosta	8	M	20	39	White center, green edges	1999	One of the nicer, white-centered hostas: leaf center emerges yellow but changes to creamy-white later in the season and is surrounded by a wide dark green margin. Moderate corrugation and above average substance complimented by a vigorous growth rate make this a desirable plant. Topped with pale lavender flowers.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Atlantis Hosta	8	L	20-24	40-60	Green with light yellow margin	2004	H. 'Atlantis' is a superb tetraploid mutation of our H. 'Abba Dabba Do' from Minnesota's Hans Hansen. This amazing hosta makes a huge 5' wide clump of slightly wavy, pointed green leaves. Each leaf is bordered with a very wide light yellow margin. In mid-summer, the vigorous clump is topped with 30" spikes of light lavender flowers...stunning!	10	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
August Moon Hosta	10	ML	22	43	Gold when mature	1964	In spring the leaves are a greenish yellow, maturing to a glowing gold, cordate, with excellent texture.	5	
Blue Mouse Ears Hosta	7	Min-S	4-8	20	Blue green	2002	Small round, sort of heart shaped blue leaves of very heavy texture. Also slug resistant.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Blueberry Muffin Hosta	3	ML	24	30	Blue	?	This semi-upright little blue number features excellent long-lasting blue color, red-speckled petioles, and interesting lunar-landscape leaf surfaces. It grows steadily but not extremely fast and shows good heat and sun tolerance. Flowers are small and numerous with plenty of seed set in little rounded pods. The leaves are 5x7 inches and the plant is 24 inches tall and may reach 30 inches wide.	7.5	
Carolina Sunshine Hosta	12	M	16-18	30-40	Dark green with golden yellow edge	1999	A phenomenally vigorous plant with glossy long dark green leaves, each surrounded by a wide butterscotch-yellow border that holds all season. H. 'Carolina Sunshine' makes a stunning 40" wide clump, which is topped in July with 20" scapes of medium lavender flowers.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Cherry Berry Hosta	10	SM	14	30	White with dark green edge	1991	Lance-like leaves have white center and dark green margins that jet frequently into the clear white. The leaf stems or petioles show a clear reddish center. The name comes from the fall color of the seed pods which are cherry colored. The lance-shaped leaves are creamy white edged in dark green. The upright growth habit shows off the red leaf petioles and flower stems. A stunning plant! Purple flowers.	5	
Cherry Tart Hosta	9	S	6-2	14-24	Chartreuse/yellow	?	Red petioles, the deep scarlet color of ripe pie cherries. A small but vigorous plant with leaves of a vibrant Spring yellow, 'Cherry Tart' has bright appeal for all hosta gardeners. It would be wonderful in the garden in an elevated feature position where it can catch the sun and light up like a firefly.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Chinese Sunrise Hosta	3	SM	11-14	18	Chartreuse/green with dark green edge	1960	Lancifolia sport. Long, narrow, chartreuse leaves with a dark green border. Medium lavender flowers in August. Very prolific. Narrow, lanceolate shiny gold chartreuse leaves with a green margin. May turn all green in Summer. Tolerates sun. Bell shaped lavender flowers late in season. Very early emerging in Spring.	5	
Choo Choo "Train Hosta	5	L	24	38-72	Gold	1991	The thick golden foliage is incredibly ruffled, making a statement from quite a distance. In summer, the clumps are topped with 3' scapes of near white flowers. Forms a clump up to 6' across with beautifully ruffled, nicely veined, greenish yellow leaves, broadly ovate. Pale lavender flowers. Early day sun with light afternoon shade will promote this hosta to reach full size.	10	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Christmas Tree Hosta	4	ML	20	36	Medium to dark green with creamy white edge	1982	Flowers in July produce a flower with vestigial leaves in the shape of a Christmas tree, hence its name. The plant has very nice substance and is heavily crinkled.	5	
Cracker Crumbs Hosta	4	Min	6	12	Yellow with dark green edge	2002	A showy miniature host for that special spot in the garden. The leaves emerge bright yellow-gold surrounded by a dark green margin that looks painted on. As the season progresses the color becomes chartreuse and then almost coppery and continues to darken until late summer. A superior grower with great substance and makes a tight clump topped with dark lavender flowers in midsummer.	10	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Edge of Night Hosta	7	ML	20-30	40	Dark green	1988	A large, very heavily textured, dark green hosta that makes a very nice specimen. The leaves are held erect. The mauve/lavender flowers stand out nicely against the dark green foliage.	7.5	
Empress Wu Hosta	8	Giant	40-60	60=108	Green to dark green	2008	The giant was the 2023 Hosta of the Year. The huge dark green leaves have deeply impressed veins and tremendous substance. A magnificent specimen which can be the centerpiece of any garden.	10	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
First Frost Hosta	4	SM	14	35	Blue to dark green center with yellow to cream edge.	2002	This sport of 'Halcyon' stands out among its neighbors in the garden. It looks particularly brilliant at twilight or in full moonlight.	5	
Formal Attire Hosta	3	ML	20-30	36-48	Green with white edge	1988	This hosta makes a very bold statement with its very dark, corrugated blue green leaves surrounded by a wide border of creamy gold changing to pure white during the season. It forms a large, dense mound of lightly cup shaped leaves	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Fortunei Albomarginata Hosta	5	ML	24	40-56	Green with white edge	1987	A dense mound of draping leaves until frost makes this hosta a good edger or useful for mass planting. It has rapid growth.	5	
Francee Hosta	3	M	15-18	24-36	Dark green with white edge	1986	Also known as 'Fortunei Francee', this hosta is a vigorous grower and looks good no matter what the weather is. It forms a neat and elegant mound.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Frances Williams Hosta	2	L	24-36	54-60	Blue/green center with yellow/green margins.	1936	This hosta originated in Connecticut in 1936 as a <i>H sieboldiana</i> seedling purchased by Mrs. Williams, was named in 1963, and was registered in 1986. The leaves are rounded with almost no tip. The parent plants of these Frances Williams offerings show more resistance to sunburn than typical for the variety. It makes a good specimen plant.	7.5	
Glory Hosta	3	SM	11-14	16-24	Yellow	1985	This hosta has large, ruffled, brilliant yellow, heart shaped leaves. This hosta originated in Minnesota in the garden of Bob Savory.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Gold Edger Hosta	10	S	7-8	18-30	Gold	1978	This vigorous growing hosta is often used as an edger for woodland beds. It forms a small, neat, dense mound of heart-shaped chartreuse to gold leaves and produces abundant lavender flowers.	5	
Gold Standard Hosta	9	ML	15-22	36-60	Golden yellow center with green edge	1976	The leaves emerge a bright light green with a dark green margin turning gold with a light green margin by summer; outstanding. It is one of the most popular mediovariegated cultivars, a definite standard among hostas. The best gold coloring is reported to come from it having several hours of morning filtered sun.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Golden Empress Hosta	9	SM	12-16	22-36	Gold	1990	The heart shaped golden leaves have a slight wave on the edges. It is a fast grower which is topped with large scapes of lavender flowers in early summer. It can take quite a bit of sun.	5	
Guardian Angel Hosta	5	L	22-26	40-60	White to light green center with blue green edge	1995	This showy hosta has a whit centered leaf early in the Sprin which grows progressively greener throughout the season; the border is blue/green. The leaf center is viridescent in early summer.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Hanky Panky Hosta	3	S	8-10	12-36	Dark green, white, yellow to white edge	2004	This sporty of Striptease make a fast growing clump of dark green leaves surrounded by gold border with a narrow with thread between the 2 patterns.	7.5	
June Hosta	17	SM	12-15	12-18	Light green/yellow center, chartreuse edge	1991	'June' is a 'Halcyon' sport and has lovely gold centered leaves with wide blue-green margins and excellent pest resistance and substance.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Lakeside Hoola Hoop Hosta	8	Min-S	6-8	8-14	Green w/ yellow edge	2003	This is a miniature to small hosta with an upright habit which is eye catching. It is a vigorous grower that can take sun.	5	
Lakeside Paisley Print Hosta	3	SM	8-12	20-30	Cream, dark green edge	2006	This pretty hosta was the 2019 Hosta of the Year. It has very wide, wavy green borders surrounded by a narrow creamy center.	5	

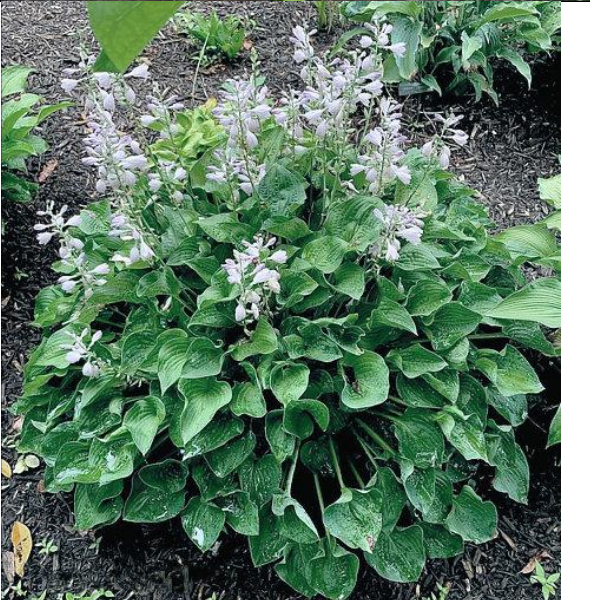

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Lederhosen Hosta	12	ML	12-14	24-30	Blue-green	2010	This is a very rare, unique hosta usually round only in private collections. The texture of the leaves is unique and resemble the leather britches of Bavaria and Austria for which it is names.	10	
Lunar Orbit Hosta	4	ML	14-16	20-28	Yellow, dark green edge	1991	This is a sport of August Moon which has a corrugated, cordate, leathery leaf.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Masquerade Hosta	6	Min	4-6	10-18	With w/green edge	1996	This miniature hosta has narrow, white centered leaves with medium green margins and forms masses of tiny plants.	7.5	
Maui Buttercup Hosta	4	S	8-10	12-14	yellow	1991	This small hosta forms a mound of gold foliage that is cupped and puckered. It is considered by many to be one of, in not the best of the small gold hostas.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Moerheim Hosta	9	L	20-24	30-48	green w/ yellow/white edge	1986	This is a hosta which forms clumps of palisading, spear-head leaves. It is of European origin with a German name.	5	
Moonlight Hosta	6	ML	18-20	30-50	yellow/chartreuse w/ white edge	1977	This is a sport of Gold Standard, with the same vigor and leaf form. These heart shaped leaves emerge green with a white margin. The center color transitions early summer to yellow for a different contrast to the white margin. But the show's not over! As a final display, midsummer, the centers turn parchment white.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Neptune Hosta	5	L	22-28	30-50	Blue/green	2006	Hosta Neptune is a stunning specimen. It forms a medium to large upright clump of wedge-shaped blue-green leaves that are wonderfully rippled and cascade downward. Lavender flowers open during August on arching stems.	10	
On Stage Hosta	9	ML	14-16	20-28	White w/ narrow green edge	1986	This is one of the most talked about hostas in any garden. The pointed, deeply veined leaves are green with a multi-tone gold center. It emerges very late in spring with a bright gold center that changes later to white, then to a light/dark green contrast late in the season. When planted in morning sun, it holds its color better through the summer.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Orange Marmalade Hosta	6	ML	14-20	24-42	Yellow/white center with blue/green edge	2002	This hosta is already a classic, and deservedly so. A sport of 'Paul's Glory', but with a much more dramatic distinction between the margin and the center colors. And it shows colors for the center you may not find in any other hosta. If you wear the right sunglasses, you might even say it's orange in early spring; this orange-gold later fades to a creamy white.	7.5	
Pamela Lee Hosta	8	S	8-10	12-36	Dark green center with light green edge	2007	This is a sport of Radiant Edger with thick, heart-shaped blue/green leaves that have a very wide green, unique shaped border.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Parhelion Hosta	4	L	24-28	30-48	gold/chartreuse with a narrow creamy white edge	1997	This sport of Sum and Substance has good vigor and nice form. The very large, glossy gold-chartreuse leaves are surrounded by a creamy white border. It makes an impressive clump.	10	
Pearl Lake Hosta	6	SM	12-15	14-22	Green	1982	This is a compact hosta ideal for the smaller garden, especially noted for its profuse bloom. Lavender blossoms are produced midsummer on top of the blue green heart shaped foliage. The leaves grow very dense and compact. The flower buds are distinctive and ball shaped. Large plants send up many scapes and when this plant is in full bud stage, these many scapes with the numerous ball shaped flower buds resemble pearls. Vigorous grower.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Pilgrim Hosta	7	S	6-10	12-20	Light green center with creamy yellow edges.	1997	This small hosta forms a nice, distinct mound with slightly curled heart shaped leaves with creamy yellow edges contrasting its light to medium green center.	5	
Pineapple Juice Hosta	9	M	15-18	24-36	Yellow with chartreuse stripes	2003	This sport of Pineapple Upside Down cake forms impressive mounds of spear shaped leaves which have subtle toned strips of green at various areas within the yellow color.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Pineapple Upside Down Cake Hosta	13	M	15-18	24-36	Green/yellow/white with dark green edge	1999	The lance shaped, ruffled, heavy substance leaves emerge green and become gold or white in more light with variegation.	5	
Pizzazz Hosta	3	SM	12-16	12-30	Blue/green w/ white edge	1986	This elegant plant of heart-shaped frosted glaucous leaves with light-cream to white wavy and irregular margins forms masses of white flowers.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Pleasure Seeker Hosta	3	ML	14-22	36-48	Steel Blue	2010	Steely blue, deeply veined, leaves with undulating edges twist at the end. It is a strong grower and can be placed in deeper shade for the best color.	10	
Praying Hands Hosta	1	M	14-16	12-30	Dark green w/ narrow yellow edge	1996	This is one of the most unique hostas to ever come along. The extremely elongated, dark green leaves have a waxy sheen and a very thin yellow rippled border. The leaves are folded and wavy giving the appearance lending to its name.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Red October Hosta	8	M	15-18	24-36	Green	2009	This unique hosta gets its name from its red stems and that it flowers in late September to October with lavender flowers. The leaves are spear shaped and an attractive medium to light green.	5	
Silver Thread Golden Needles Hosta	4	Min-S	4-8	8-15	Yellow w/ green center and gray spots.	2010	The chartreuse, yellow leaves have an unusual central pattern of green that takes up 80% of the leaf area. The green is then overlain with a white frosting. The clumps are topped with 8" stalks of light lavender flowers in late spring.	10	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
So Sweet Hosta	9	S	10-16	18-40	green w/yellow/cream/white edges	1986	Hybrid of H. plantaginea with shiny deep green leaves and creamy white changing to white margins. Plant grows rapidly, reaching 14-16 inches tall. The fragrant white flowers appear in August and match the attractive white variegation. Hosta of the Year for 1996.	5	
Stiletto Hosta	11	S	10-14	18-36	Green w/narrow yellow/cream edge	1987	Very narrow, pointed, lance-shaped leaves, green with thin gold to creamy white undulating margins form a nice tight mound. The narrow lance shape foliage is almost grass like with a bright cream edge. This small hosta makes an interesting specimen plant in a rock garden.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Striptease Hosta	7	ML	18-20	30-50	Chartreuse with narrow white and dark green edge	1991	This is an intriguing hosta sport of Gold Standard with a narrow gold center and rich green margins with white etching between the two colors. This unique variety is a vigorous grower with violet flowers.	5	
Sun Power Hosta	8	ML	20-28	30-60	Golden yellow	1986	As it names implies, this hosta can take quite a bit of sun without being burnt. The leaves are undulating and rapidly grow into an impressive clump.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Sweet Home Chicago Hosta	7	M	14-18	30-45	Yellow/green/chartreuse center w/green edge	2002	The heart shaped leaves have a light green center with a wide, brilliant green edge which forms attractive mounds.	5	
Teaspoon Hosta	3	S	8-12	14-24	Green	1998	This unique hosta has cute, round green leaves that have a spoon-like appearance and a slightly serrated edge.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
The Razor's Edge Hosta	4	S	12-14	18-24	Green	2005	A small and fast growing with good substance. The long wavy leaves stand up to show off their sharp red petioles (stems) and white backs. The undulation of the leaves, arrow width, and long, lance shape lends to its name.	5	
Touch of Class Hosta	3	M	16-18	24-36	Chartreuse yellow w/ blue/green edge	1999	The central pattern of the doubly thick leaves is chartreuse-golden surrounded by a very wide blue-green border. This is an intensely and dramatically colored hosta which is quite attractive.	7.5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Twilight Hosta	5	SM	10-20	14-28	Dark green w/ yellow edge	1997	The dark, glossy green leaves are graced with wide yellow margins and have good substance and texture. This hosta comes from the Netherlands.	5	
Veronica Lake Hosta	9	SM	14-18	30-45	Blue/green w/creamy white edge	1993	The impressive clumps of heart shaped leaves with blue/green centers and creamy white to yellow edges are attractive when planted en masse or individually.	5	

Hosta	#	Size	Height (in)	Width (in)	Leaf Color	Introduction Year	Description	Sale Price (\$)	Photograph
Whirlwind Hosta	8	SM	14-20	24-40	White center with green/dark green edge	1989	A shiny, dark green margin surrounds the center of the leaf which changes from pale green to creamy white with green striping during mid-season. The leaves are slightly twisted and curved and have heavy substance.	5	
Wide Brim Hosta	2	ML	18-20	30-50	Dark green w/yellow/cream edges	1979	The dense, hosta has heart shaped leaves with a dark to medium green center and attractive irregular creamy yellow edges.	5

Other Perennials

Plant	Quantity	Height (in)	Width (in)	Leaf Color	Description	Sale Price (\$)	Photograph
Bergenia	5	12-15	15-26	Light, bright green.	This is a tough, evergreen perennial. It is slowly spreading forming clumps of glossy leaves which produce short spikes of showy pink/purple flowers in spring. It is a unique addition to the shade garden.	7.5	
	Coral Bells						

Foamy Seas Coral Bells	8	12-14	14-18	Red/Pink	The maple like leaves produce attractive clumps and produce delicate sprays of white flowers.	7.5	
Pino Gris Coral Bells	5	12-14	14-18	Deep red	The maple like leaves produce attractive clumps and produce delicate sprays of pink to white flowers.	7.5	

Desdemona Ligularia	18	24-36	24-42	Red to greenish bronze	The leaves of this showy plant transform from deep red in the Spring to greenish bronze. Golden yellow daisy-like flowers appear on deep purple stems midsummer.	10	
	Goat's beard						

Misty Lace Goat's Beard	14	12-20	16-20	Green	This is a medium sized Goat's Beard which produced attractive creamy white flowers in early summer.	5	
Dwarf Goat's Beard	16	8-12	12-18	Green	This is the smallest of the Goat's Beards and produces attractive white flowers on short stems in early summer.	5	
Ferns							

Sensitive Fern	11	24-30	18-24	Green	This native fern can tolerate a wide range of soil types and is usually found in open, wet meadows or woodland edges.	5	
Christmas Fern	9	14-24	28-36	Green	This fern has fronds which remain vibrant after frost until at least Christmas if not covered with snow. This is a unique, showy, fern.	10	

Maidenhair Fern	15	12-16	15-22	Green	This native fern has finely textured fronds on reddish brown stalks. It is very showy and complements other shad garden plants such as hostas.	7.5	
Ostrich Fern	?	24-40	18-24	Green	This native fern is large, moisture loving, and has fronds that resemble ostrich feathers. It is sun tolerant with sufficient water.	1# = 5; 2# = 7.50	

Milky Way Pulmonaria	13	10-12	16-20	Green with white/silver spots	This plant gets its name from resembling lungs with tuberculosis lesions. The fuzzy, green leaves with prominent spots produce pink and purple fine flowers in the Spring.	5	
European Ginger	6	6-10	12-15	Brilliant green	This attractive ground cover has waxy, green leaves with a unique heart shape.	5	

Lady's Mantle	12	10-18	18-24	Lime green	This attractive plant can handle dry conditions and shade. The lime green serrated foliage is adorned with yellow/green flowers in the Spring.	5
